

Interactive Touch Monitor + Smart TV **65 - 75 - 82**

Interactive Easy Board is an all-in-one touch monitor and Smart TV, especially designed to meet the requirements of conferences, education, business and entertainment.

It combines the functions of an interactive whiteboard and a Smart TV to create multimedia interaction, presentations and conferences.

Interactive Easy Board is available in several formats, ranging from 65" up to 84", with a resolution from 1080p Full HD up to 4K UHD infrared technology. The monitor multi-touch technology supports up to 10 touches at the same time.

The product can also be combined with a MINI PC (optional) placed on the back, making the monitor independent from an external system and thus avoiding the use of external cables and PCs.

The supplied EasyBoard software offers a wide range of standard tools, pens and erasers and many other advanced functions suitable to make lessons more interesting, exciting and even shareable.

Touches are recognized with extreme precision thanks to the latest generation IR technology. The Interactive Monitor is fully compatible with Windows 7/8/10 and Android.

If you are looking for an advanced teaching tool that will allow you to easily capture the attention of students by ensuring an optimal and enjoyable learning and teaching experience, this product is the right one.

The product is equipped with 20W RMS Interactive Hi-Fi Dolby Digital Plus Speakers.

Thanks to the Infrared Multi-Touch Easy © technology, images can be easily resized and rotated.

HDR

Watch your HDR content with greater clarity and even more detailed color reproduction. Experience the true HDR experience characterized by deeper blacks and bright whites.
